Education & Credentials

Full-Stack Web Development Certificate I 2022

University of California, Irvine, CA

Bachelor of Science in Business Management I 2022

University of La Verne, CA (GPA: 3.97)

Experience Highlights

Victory Taekwondo, Whittier, CA Front-end Developer

2022 – Present

Develop and manage responsive website to display company's information, operations, and contact information. Design with react, styled components, ant design, and multiple other react libraries.

Key accomplishments:

- Communicated with customers for feedback to implement better user experience.
- Attained positive feedback from customers for providing quality services and user-friendly website.
- Maximized number of students signing up on website and achieved positive feedback on user interface of application by customers.

Actively engaged in intensive Full-Stack Web Development program focused on acquiring technical programming skills in JavaScript, HTML/CSS, MongoDB, MySQL, React.js, Node.js, Express.js, Unit Testing, Redux, and GraphQL.

Key accomplishments:

- Gained real world experience through live projects development individually and with team.

Relevant Projects

Soundify

- Repository: <https://github.com/calvin-kim13/Soundify> | Live: <https://soundify-home.herokuapp.com/>
- Created a full-stack application that requires user sign up or sign in to use the application. The application allows users to listen to music, upload their own music, and add music playlists. Mainly used React, AWS, JWT, Express, MongoDB, mongoose, GraphQL, Ant Design and Github for team collaboration.

CKclothing

- Repository: <https://github.com/calvin-kim13/ckclothing> | Live: <https://ckclothing.netlify.app/>
- E-commerce project that allows users to create an account or sign in to start adding items to their cart. The app allows users to add products to their cart, checkout, and add their card information. The project does not have real inventory and the payment platform is not connected to a real bank. Developed with React, Firebase, Stripe, Scss, Styled Components.

Bug Tracker

- Repository: <https://github.com/calvin-kim13/bugTracker> | Live: <https://bug-zapper-app.herokuapp.com/>
- Developed full-stack application to facilitate users to sign up and login for application use, design project and add contributors, and add bug tickets to project to resolve issues. Mainly used sequelize, express.js, node.js, MySQL, handlebars, and GitHub for team collaboration.

Coinio

- Repository: <https://github.com/calvin-kim13/coinio> | Live: <https://coinio.netlify.app/>
- Spearheaded cryptocurrency project to display trending cryptocurrencies and financial information. Managed live search box to filter coins and enabled crypto chart screener. Created application via React.js, Material UI, Chart.js, and React Router.

Technical Proficiencies

Languages:	JavaScript, CSS3, HTML5
Front-End:	React.js, Typescript, Redux, Styled Components, Ant Design, Material UI, Tailwind, Scss
Back-End:	MongoDB, mongoose, Express.js, Node.js, MySQL
Other:	Jest Unit Testing, Git, Redux Toolkit, GraphQL, Stripe, Firebase
