

Full-stack software engineer passionate in building and maintaining fully functional responsive web pages, scaling systems up, and delivering reliable applications. Passion in building applications with React.js and its associated user interface libraries including Ant Design and more. Strong ability to work with API's. Experience with collaborative git features and test driven development. Personal strengths include adaptability, teachability, determination, and teamwork.

Work Experience

Freelance Developer	Victory Taekwondo	2022–Present
Front-end Developer	Whittier, California	
<ul style="list-style-type: none">• Responsive website that displays the company's information, operations, and contact information.• Created with React, Styled Components, Ant Design, and many other react libraries.• Live: https://victorytkd.netlify.app/		

Projects

- **Bug Tracker** (Team project)
 - **Repository:** <https://github.com/calvin-kim13/bugTracker> | **Live:** <https://bug-zapper-app.herokuapp.com/>
 - Full-stack application allowing users to sign up and log in to use the application. Once a user logs in, they can create a project and add contributors so that the contributors can add bug tickets to the project if they come across issues. The owner and other contributors can then view the ticket and resolve the issue. Once the issue is resolved, the bug can be deleted. Mainly used sequelize, express.js, node.js, MySQL, and handlebars.
- **Coinio** (Individual project)
 - **Repository:** <https://github.com/calvin-kim13/coinio> | **Live:** <https://coinio.netlify.app/>
 - Cryptocurrency project that displays trending cryptocurrencies and its financial information. Live search box that filters through the coins and displays the coin that was searched. Crypto chart screener is available when a cryptocurrency is clicked. Application was created with React.js, Material UI, Chart.js, and React Router.

Education and Certifications

- **Full-Stack Web Development Certificate**, University of California, Irvine. **2021–2022**
 - An intensive Full-Stack Web Development program focused on gaining technical programming skills in JavaScript, HTML/CSS, MongoDB, MySQL, React.js, Node.js, Express.js, Unit Testing, GraphQL, and more. Gained real world experience by building live projects individually and with a team.
- **B.S in Business Management**, University of La Verne, California. **2018–2022**
 - GPA: 3.97
 - Relevant courses taken: Information Technology, Statistics, Management Information Systems, Operations Management, Organizational Behavior, Management of Change and Conflict.

Languages and Technologies

- **Languages:** JavaScript, CSS3, HTML5
- **Technologies:** React.js, Ant Design, GraphQL, Express.js, Node.js, jQuery, Bootstrap, MongoDB, MySQL
- **Other:** Unit testing, git, API
